Sir:

An interview was conducted with the Examiner on March 28, 2007. Present at the interview were the Hadi Shakeri (the Examiner), Bobby Hu (the inventor), Karl Smith, Adam Bogesch, and Hans-Martin Viering. Claim 60, as amended in the Response to Office Action filed January 29, 2007, was discussed in relation to the previously cited prior art, namely JP 11-165271 and DE 18180811. Models of embodiments of both the current invention and JP 11-165271 were demonstrated to the Examiner. Applicant argued that the amended claim 60 reads over the prior art, at least in that the prior art does not teach a pin that engages the shoulders of a recess in the pawl to switch and maintain the position of the pawl. The Examiner agreed that amended claim 60 reads over the cited art.

Respectfully submitted,
